

Know your tsunami risk

Find out about your tsunami risk

Contact to your local NSW SES Unit to get localised tsunami information.

Know your tsunami evacuation areas by reviewing the **Evacuation Area Map** on the [NSW SES website](#).

Be aware of the signs and consequences of tsunami

Tsunami are a series of powerful waves that impact coastal areas over a period of time, and dangerous tsunami currents can last for many days after the initial impact.

Tsunami have many impacts and consequences, for example:

waves, tidal surges and damaging ocean currents that are strong and powerful

waves that can travel much farther inland than normal and that are more destructive

flooding of low-lying coastal areas is possible for over 2 kilometres inland

rivers and streams that lead to the ocean can encounter waves that travel up and wrap around headlands and islands

Get Prepared

Download the **Hazards Near Me** app to your mobile devices and create **Watch Zones** for the areas you live, work and visit.

Prepare **tsunami evacuation plans** for your home, business and properties that are within tsunami risk areas, and make sure you plan for all people and animals in your care.

Share your emergency plan with family, neighbours and colleagues and review it regularly.
