

Make **safe decisions** during a tsunami

Know the warnings

The **NSW SES** will issue the following warnings dependent on the level of tsunami risk:

- **Advice - Stay Informed**
- **Emergency Warning - Avoid the Area**
- **Emergency Warning – Evacuate**
- **Advice - Monitor Conditions**
- **Advice - Reduced Threat Return with Caution**

Act safely

There may be little time to prepare – you must act immediately.

Follow all advice provided in the tsunami warning:

For an **Emergency Warning - Avoid the Area** – get out of the water and move away from coastal areas and waterways that are connected to the ocean.

For an **Emergency Warning – Evacuate** – move away at least 1 kilometre inland. If you cannot leave, move to a sturdy building, at least 10 metres above the usual sea level.

If you are trapped

Call **NSW SES** on **132 500** if you require emergency assistance or **Triple Zero (000)** if you are in a life-threatening situation.

If you are able

Assist others in need if you can and only if it is safe.
